Description:
“Powerful . . . As haunting a postapocalyptic universe as Cormac McCarthy [created] in The Road, and as devastating a look as the fallout that
national events have on an American family as Philip Roth did in The Plot Against America. . . . Omar El Akkad’s debut novel, American War, is
an unlikely mash-up of unsparing war reporting and plot elements familiar to readers of the recent young-adult dystopian series The Hunger Games
and Divergent.”—Michiko Kakutani, The New York Times

An audacious and powerful debut novel: a second American Civil War, a devastating
plague, and one family caught deep in the middle—a story that asks what might happen if America were to turn its most devastating policies and
deadly weapons upon itself.

Sarat Chestnut, born in Louisiana, is only six when the Second American Civil War breaks out in 2074. But even she
knows that oil is outlawed, that Louisiana is half underwater, and that unmanned drones fill the sky. When her father is killed and her family is
forced into Camp Patience for displaced persons, she begins to grow up shaped by her particular time and place. But not everyone at Camp
Patience is who they claim to be. Eventually Sarat is befriended by a mysterious functionary, under whose influence she is turned into a deadly
instrument of war. The decisions that she makes will have tremendous consequences not just for Sarat but for her family and her country, rippling
through generations of strangers and kin alike.

American War takes place in a late-21st-century America that is a shell of its former self, broken by internal strife, rising seas, extreme weather
and bioterrorism. The Second American Civil War isn’t fought over race (these Americans appear to mostly be over racial hangups) but power...
specifically, fossil fuels. The ascendant world powers are Asian and Muslim. In this future, the Muslim Bouazizi Empire got popular revolution right
on the fifth try, and the Red Crescent is running the refugee camps in the Free Southern States. And we meet Sarat, the protagonist of the book, at
age 6, in a Louisiana that’s mostly underwater, as her parents are starting to talk about getting work permits to move North. The book is a study of
how terrorists are made, and the arc of Sarat’s life, from atrocities in the refugee camp her family fled to, to her recruitment, her successful missions,
her capture and torture, and ultimately her awful revenge, have many real-world parallels that aren’t too hard to spot, or intended to be. Still, the
book is deft, entertaining, and provocative. The central conceit of the book can be found in these lines given to Karina, a nurse who emigrated to
the US from what was left of Bangladesh after the seas rose:...the misery of war represented the world’s only truly universal language. Its native
speakers occupied different ends of the world, and the prayers they recited were not the same and the empty superstitions to which they clung so
dearly were not the same—and yet they were. War broke them the same way, made them scared and angry and vengeful the same way. In times
of peace and good fortune they were nothing alike, but stripped of these things they were kin. The universal slogan of war, she’d learned, was
simple: If it had been you, you’d have done no different. I ripped through this in three days, reading an hour or so longer a night than I had really
intended to. I haven't picked up a piece of fiction that I didn't want to put down in a while.
